User Manual

There are following steps required to successfully run the developed application:

Steps:

1. First you have to install python 2.7.13. You can download it from
https://www.python.org/downloads/.

2. Now you have to install MySQL. And create a database to insert dummy data (note: you can insert dummydata.sql file in your database which is provided by us.

3. If you able to import MySQL. Connector for database connectivity then open code1 folder and go to the dist. folder it contain two folders: one is centerGov and other one is stategov. For center gov user you need to open centergov and run the centergov.exe. And for Stategov user you need to open stategov folder and run the stategov.exe file.

4. if you do not able to import myql.connector and you are able to import mysqldb the do the same procedure as stated in step 3 on code2 folder.

For any query you can mail us at ramansudhanshu150@gmail.com
